Summary

Full-Stack Web Developer skilled in building responsive and scalable web applications using HTML, CSS, JavaScript, React.js, PHP, Node.js, and MySQL. Experienced in AI data annotation and model training, contributing 5,000+ NLP annotations and digitizing 10,000+ public records with 99.5% accuracy. Proficient in creating structured datasets, reviewing AI-generated code, and improving machine understanding of web technologies. Creative professional with 2+ years of experience in video editing, photography, and digital media production. Combines technical development, AI training, and visual storytelling to deliver high-quality digital solutions for modern and remote-first teams.

Experience

Joven Fashion

(Jan 2026-Present)

Full-Stack Web Developer & Content Strategist

- E-commerce Optimization: Managed and maintained a high-traffic e-commerce platform, ensuring 90% uptime and optimizing page load speeds to enhance user retention.
- Full-Stack Maintenance: Utilized a tech stack including HTML, CSS, JavaScript to implement responsive UI updates and secure backend workflows.
- Performance Monitoring: Leveraged analytical tools to monitor website performance and user behavior, identifying and resolving technical bottlenecks to improve conversion rates.
- Creative Content Lead: Conceptualized and designed 20+ social media marketing assets using Adobe Photoshop, Illustrator and Canva, delivering visually compelling content that improved brand visibility and audience interaction.

Matshya Narayan Recreation Center

(Jan 2022-July 2024)

Photography , Videoeditor and Social Media Manager

- Content Production: Captured and post-processed 50+ high-fidelity photos and videos for major events, utilizing Adobe Premiere Pro and Lightroom to ensure a premium visual standard.
- Engagement Growth: Executed a data-driven content strategy that successfully boosted digital engagement by 30% through targeted visual storytelling.
- Creative Direction: Produced professional event highlight reels featuring custom color grading and cinematic transitions, resulting in a measurable increase in client satisfaction and brand perception.
- Graphic Design: Designed a suite of high-impact promotional posters and digital assets that directly contributed to a 20% increase in event attendance.
- Platform Optimization: Managed the end-to-end publishing workflow across Instagram and Facebook, ensuring all assets were optimized for cross-platform performance and mobile responsiveness.

Kuhiro Dada Agro Rest House and Heavenly Village Resort

(Part time)

Photography and Videography

- Content Strategy & Growth: Collaborated with the development team to produce cinematic social media content, resulting in a 40% increase in online brand presence.
- Multimedia Optimization: Edited and optimized a library of 100+ high-fidelity videos and photos for Instagram and Facebook, ensuring all assets met platform-specific performance standards for maximum reach.
- Collaborated with the development team to create social media content, boosting online presence by 40%.
- Edited and optimized 100+ videos and photos for platforms like Instagram and Facebook.

Skills

Full-Stack Development: : React.js (Vite), JavaScript (ES6+), Node.js, Express.js, PHP, REST APIs

Databases: MongoDB (Atlas), MySQL

Frontend & UI: HTML5, CSS3, Tailwind CSS, Responsive Design

Tools & Deployment: Git, GitHub/GitLab, npm, Netlify, Vercel, XAMPP

Design & Media: Figma, Word Press , Adobe XD ,Adobe Photoshop, Premiere Pro , Adobe Lightroom , Adobe After Effects

Education

Vedas College (Tribhuvan University)

2022-2027

Bachelor in Computer Application

Kathmandu College of Central State

2020-2022

Computer Application

Projects

Cafe POS System (In Progress)

Tech Stack: MERN Stack (MongoDB, Express.js, React, Node.js)

- Designing and developing a real-time café ordering and POS system supporting both customer-side and admin-side workflows.
- Implementing real-time order synchronization between users and admins for efficient order processing.
- Building a scalable admin panel for menu management, order tracking, and operational control.
- Developing modular REST APIs with clear data validation and error handling.
- Leading the full project lifecycle including system architecture, frontend, backend, and database design.
- Applying best practices for state management, component reusability, and performance optimization.

Nike-Dunks Ecommerce

Tech Stack: MERN Stack

Live: [Website](#)

- Developed a production-ready eCommerce application with real-time product ordering and admin management.
- Implemented secure user authentication, cart workflows, order placement, and order lifecycle tracking.
- Built a robust admin dashboard to manage products, inventory, and customer orders.
- Designed RESTful APIs ensuring consistent data flow and synchronization across frontend and backend.
- Delivered a responsive, performance-optimized UI for cross-device compatibility.
- Deployed and maintained the application with focus on reliability, scalability, and clean code standards.

Explore Nepal - Travel and Guide

Tech Stack: MERN Stack

- Engineered a full-stack travel platform for managing tour packages and local guide bookings.
- Implemented real-time booking workflows for users and administrators with secure data handling.
- Designed backend services to support package listings, guide management, and booking operations.
- Created a user-centric and responsive interface tailored for travelers across devices.
- Applied modular architecture to support future feature expansion and maintainability.
- Independently managed frontend, backend, and database integration.

Futsal Booking System

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

- Architected and developed an end-to-end online futsal court reservation system with real-time availability validation.
- Designed secure authentication flows, user profile management, and persistent booking history.
- Implemented a 6-digit payment verification mechanism to ensure booking authenticity and prevent duplicate reservations.
- Built a role-based admin dashboard to manage users, monitor bookings, cancel reservations, and track payment status.
- Structured the application with separation of concerns between business logic, UI, and database layers.
- Optimized MySQL schema for data integrity, scalability, and secure storage.
